

LMU
School of Allied Health Sciences
LINCOLN MEMORIAL UNIVERSITY

Dear Potential Student,

Thank you for your interest in the Bachelor of Science Veterinary Medical Technology (BS VMT) degree program at Lincoln Memorial University! It is truly an honor to work with other Licensed Veterinary Technicians and graduates from an AS degree program, who desire to challenge themselves to work toward a higher degree in their field of study. Veterinary Medicine is an exciting and rewarding field of study, and as a Licensed Veterinary Technician our role within the field is of utmost importance. By obtaining a BS in Veterinary Medical Technology (BS VMT), you will not only further your education, but you will also prepare yourself to become an instrumental leader and much needed asset to the veterinary community.

In order to be considered for admission into the BS VMT degree program, you must complete the application process for the program. This application is separate from the application to the University, which needs to be completed through the LMU Admissions Office.

A checklist for the BS VMT degree program, as well as the application is attached. Please be sure to gain acceptance into Lincoln Memorial University first, then complete the BS Veterinary Medical Technology (VMT) application. While the BS VMT program observes a rolling admissions cycle, applicants are encouraged to return all application materials as early as possible.

Priority Application Deadline for fall semester: June 15th

Priority Application Deadline for spring semester: November 15th

I look forward to helping you achieve your goal of becoming a Licensed Veterinary Technologist!

Kind regards,

Heather Bhakta, DVM
